New York, October 1st, 1873.

Dear Sir:

Having had many applications for **DESIGNS IN WOOD WORK.** from different parts of the country, we have prepared, and now forward to you

OUR ILLUSTRATED CATALOGUE.

We hope you will find it both useful and convenient, as a book of reference, from which you may select such styles and designs as may please you, of

**FRONT DOORS, INTERIOR DOORS, FANCY VENEERED
NEWELS, BRACKETS, CUT AND EMBOSSED GLASS, &c.**

Many of these designs are original, and all of them are good and worthy of attention. It is our intention to add to this Catalogue occasionally, as styles may change, or taste may dictate.

In order to add to the interest, value, and usefulness of the book, we have inserted a few advertisements of some of the leading houses, in various branches of business kindred to ours in furnishing materials, for the construction of buildings, &c.

Yours respectfully,

KEOGH & THORNE.

FRONT DOORS.

HEAVY RAISED MOULDINGS, CIRCLE TOP PANELS OUTSIDE. FLUSH MOULDINGS, SQUARE TOP PANELS INSIDE.

SINGLE DOORS.

(See Cut No. 1.)

DOORS IN PAIRS.

(See Cut No. 2.)

ft. in.	ft. in.	1½	1¾	ft. in.	ft. in.	1½	1¾

Orders for Rail, worked for straight flight, should give the rise and tread of steps as sawed out on stringboard, the number of risers, the size of cylinder, which way it turns at landing, and length of straight rail required at head of stairs. For Winding Stairs we should have an exact plan, showing location of risers in cylinder, the width of steps, risers, &c., and the style of Rail required.

OF ALL GRADES AND VARIETY.

Books and Sheet of Designs, and Price List, furnished on application.

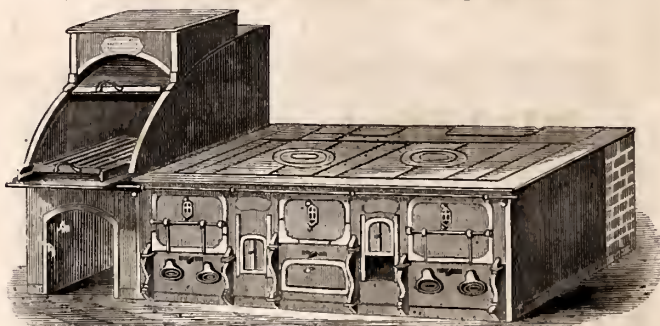

THE IMPERIAL SINGLE AND DOUBLE FACED Cooking Range,

Patented July 7, and December 29, 1868, and July 27 and October 5 and 12, 1869.

For Hotels, Restaurants, Steamboats, Public Institutions, and Private Families,

Is unequalled for its NEATNESS, DURABILITY, and ECONOMY OF FUEL, as well
for its comparative CHEAPNESS.

New Patent Imperial "Maracaibo" Coffee and Tea Urn,
Oyster and Chop House Ranges,
CARVING TABLES,
Copper and Tin Cooking Utensils.

This figure represents a Range 8½ feet long, 3 feet 3 inches wide, 2 feet 7 inches high; 2 Fire Places and 3 Ovens. The Broiler on the left, which is independent of the Range, can be placed either at the right or left, according to the disposition of the kitchen.

A Single or Double Shelf can be attached to the Range.

One or Two Water Backs can be adapted to the Fire Box; if two are required, one connection can be made for both. This Range can be set close to the wall, anywhere with or without pipes. Same style and materials used for all our Ranges, from a three foot up to any length, to order. We can make extensions to these as long as desired, and each addition of 4 feet will give one Fire Place and one Oven. Its peculiar arrangement allows the use of each fire separate without trouble.

L. F. DUPARQUET & HUOT,

Successors to E. MONEUSE & DUPARQUET,

24 AND 26 WOOSTER ST., NEW YORK,

Are the Sole Manufacturers and Introducers of the

FRENCH COOKING RANGES

IN THE UNITED STATES.

DESCRIPTION OF OUR RANGES:

These Ranges are made mostly of Wrought Iron, with Cast Iron Top. The main point is the saving of fuel. The circular disposition of the Flues does not allow a particle of heat to come outside, thereby saving at least 30 per cent. over other ranges, with open fire on the front, and this disposition gives the opportunity to the Cook to come close to the Range without fear of burning his clothes or scalding his knees.

The numerous places where they are in use is the best proof of good construction and durability. In short, these Ranges, in all their details, include the most thorough, complete and convenient cooking apparatus yet devised. All sizes, from those of a capacity to cook for twelve hundred persons, to those suitable for a single family, and are now in extensive use, nearly all the leading hotels in the principal cities of the United States using them.

Protect Your Buildings!

Which may be done with less than quarter the usual expense by the use of

GLINES' Patent Slate Roofing Paint.

A roof may be covered with a very cheap shingle, and by the application of this slate be made to last from 25 to 30 years. Old roofs can be patched and coated, and made to look much better and last longer than new shingles without the slate, for

ONE-THIRD THE COST OF RESHINGLING.

The cost of slating new shingles is only about the cost of simply laying them, and the slate is FIRE-PROOF against sparks and live coals falling upon it, as may be easily tested by any one, and as appears from the fact that Insurance Companies

MAKE THE SAME TARIFF THAT THEY DO FOR SLATED ROOFS.

For tin and iron it has no equal, as it expands by heat and contracts by cold, and NEVER CRACKS OR SCALES. For cemetery fences it is particularly adapted, as it will not corrode in the most exposed places. Roofs covered with Tar Sheathing Felt can be made water tight at a small expense.

The SLATE or PAINT is

EXTREMELY CHEAP.

Two gallons will cover a hundred square feet of shingle roof, or over four hundred of tin or iron. Price of the slate ready for use is 80 cents per gallon, \$16 per half barrel, or \$30 per barrel of about 40 gallons, with a liberal discount to the trade. We furnish and apply the material or \$2.50 per 100 square feet in the vicinity of New York.

WE USE NO TAR IN THIS COMPOSITION,

therefore it does not affect the water from the roof, if turned off for the first one or two rains.

The paint has a very heavy body, but is easily applied with a four or six inch coloring brush.

On old rotten shingles it fills up the holes and pores, hardens them and gives a new and substantial roof that will last for years. On curled or warp shingles it brings them to their place and keeps them there. It fills up the holes in tin or felting roofs, and stops the leaks; one coat is equal to ten of ordinary paint.

The color of the slate when first applied is of a dark purple, and in about a month it changes to a light uniform slate color,

AND IS, TO ALL INTENTS AND PURPOSES, SLATE.

It is a slow dryer, but rain will not effect it in the least in one hour after it is put on.

Samples sent to any part of the country by express C. O. D., at the following prices. If ordered to be sent by freight the money must accompany the order:

1 gallon and can	\$1 50
2 gallon and can	2 35
5 gallon and keg	5 50
10 gallon and keg	9 50
15 gallon and keg	13 50
20 gallon and half bbl	16 00
40 gallon and one bbl	30 00

AGENTS WANTED in every town. Orders respectfully solicited.

For full information, recommends from insurance companies and others, editorials from leading newspapers, or a sample shingle coated with the slate, address

ALFRED T. STEVENS & CO.,
122 West Broadway, New York,
Paint and Color Manufacturers, and Dealers in
PAINTS AND PAINTERS' MATERIALS,

SOLE AGENTS FOR

JOHN LUCAS & CO'S.

Celebrated Imperial French, Swiss, & Berlin Greens.

The Manufacturers of STEVENS' GRAINING COLORS and
GRAINING GROUNDS, for imitating wood.

Inventors and Manufacturers of Stevens' Patent Combination,

Which consists of a mixture or combination of pure Staining Colors, in their necessary proportions, for staining any kind of White Paint to certain desired shades of color. A Painter, with one of our Tint Books containing over two hundred desirable tints, can readily suit his customer to any tint desired.

By using our Combinations, he can easily mix the exact shade desired, and need only send just the quantity of Stainer required to complete a job, thereby saving a waste. The demand for Colored Paints has brought into the market a mixture known as Cottage Colors. The objections to these colors are: Painters are obliged to keep a large stock on hand to have an assortment of colors. *Our Combinations will obviate the necessity.*

MONITOR SASH FASTENER.

Many years' experience as architects and builders has convinced us of the necessity of a reliable Sash Fastener appliance. We now offer one that possesses the following merits: It is **BURGLAR PROOF**. The Sash must be literally torn apart in order to open it from the outside. It adapts itself to the shifting position of the Sashes. It is neat, and does not present a clumsy appearance. It draws the Sashes together by a cam movement, which prevents them from rattling, and keeps out both **WIND AND DUST**. It is made of **WROUGHT METAL**. The movements

are all positive, and will remain in perfect order by constant use for many years. In fact, it is only necessary to exhibit the Fastener to obtain approval.

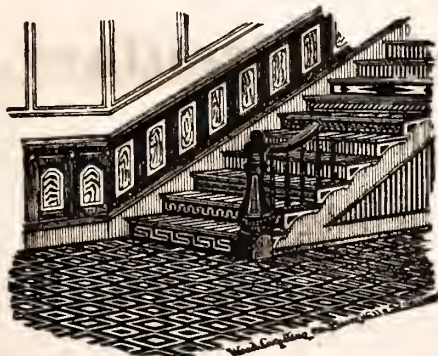

No. 1, Nickel Plated, \$5.00 per doz. No. 2, Brass, \$3.50 per doz.

Orders promptly supplied. Address

G. W. CHAMBERLAIN, 153 Centre Street, New York.

OTIS'

Safety Hoisting Machinery,

Manufactured, as a Specialty, over 20 Years.

The patented features, and successive improvements introduced by us, form the Standard Steam Hoisting Machinery of the day, both for

PASSENGERS AND FREIGHT.

Adapted to all lines of manufacture and trade—

Hotels,
Warehouses,
Stores,

Factories,
Blast Furnaces,
Mines, &c., &c., &c.

OUR SAFETY APPLIANCES are *not working parts*, but *superadded thereto*—and so arranged, that *when the working parts*, by the peculiar, continuous strain, friction and abrasion of hoisting, *suddenly fail* and break down, the *failure itself* calls them to *instant action*; bringing then to their work, their full, original, unimpaired strength—they *do not fail*.

Although a large proportion of all the Steam Hoisting Machines in use are ours, *no disasters* from broken ropes, connections or machinery, happen with

OTIS' ELEVATORS.

The "Patent Safety Lock Pawls and Ratchets," "Safety Governor and Brake," "Safety Drum" and "Automatic Stop Motion," *guard against and so prevent disasters*.

All materials and workmanship are the *best*. Every machine is built complete on homogeneous plans by competent workmen in our extensive shop at Yonkers, N. Y., fitted with most improved machinery for wood and metal working, the whole being under our own personal supervision. All work guaranteed as represented. Orders promptly filled. The following are a few of our lately erected

PASSENGER ELEVATORS.
